

ECOMMERCE

The following are the components of

1. Consumer access equipment
2. Local on-ramps
3. Global information distribution networks

A. I-WAY	B. Information superhighway
C. both a or b	D. none of the above

Answer is : C

Any successful e-commerce application requires

A. I-way	B. highway network
C. carry goods from point to point	D. none of the above

Answer is : A

_____ and _____ contents determine what type of vehicle is needed for I-way vehicular traffic.

A. Information and multimedia	B. data and processed information
C. both a and b	D. a only.

Answer is : A

Integration of various industries such as entertainment, publication and communication media is called as

A. cross-concept convergence	B. cross-media convergence
C. cross-commerce convergence	D. none

Answer is : B

Disadvantages of e-Commerce in India are

ECOMMERCE

(i)	internet access is not universally available
(ii)	(ii) Credit card payment security is not yet guaranteed
(iii)	(iii) Transactions are de-personalized and human contact is missing
(iv)	(iv) Cyber laws are not in place
A. i and ii	B. ii and iii
C. i, ii, iii	D. i, ii, iii, iv

Answer is : C

Electronic Data Interchange is necessary in	
A. B2C e-Commerce	B. C2C e-Commerce
C. B2B e-Commerce	D. Commerce using internet

Answer is : C

EDI standard	
A. is not easily available	B. defines several hundred transaction sets for various business forms
C. is not popular	D. defines only a transmission protocol

Answer is : B

For secure EDI transmission on internet	
A. MIME is used	B. S/MIME is used
C. PGP is used	D. TCP/IP is used

Answer is : B

ECOMMERCE

Expand VANs

- | | |
|----------------------------|-------------------------|
| A. Value Addition Networks | B. Value Added Networks |
| C. Value Access Networks | D. Value Added Netway |

Answer is : B

Linking all the Components of the I -Way require large capital investments in "open Systems and insatalling gateways between various networks

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : TRUE

Expand CPE

- | | |
|--------------------------------|--------------------------------|
| A. Customer Premises Equipment | B. Consumer Premises Equipment |
| C. Customer Process Equipment | D. None of the above |

Answer is : A

The set_top box is really a special purpose computer computer with powerful graphics and communications features but limited versatility

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : TRUE

Expand IXCs

- | | |
|------------------------------|----------------------------|
| A. Inter Exchange Counter | B. Inter Exchange Carriers |
| C. Internet Exchange Counter | D. Inter Exchange Council |

Answer is : B

ECOMMERCE

SMR-Expand	
A. Specialized Mobile Radio	B. Special Mobile Ratio
C. Special Marketting Ratio	D. Special Mobile Route

Answer is : A

Global Information Distribution networks represent the infrastructure criss-crossing countries and continents	
A. True	B. False

Answer is : TRUE

ARPANET was established to counter the launch of _____.	
A. Gazprom	B. Sputnik
C. INSAT	D. Zenit

Answer is : B

Mesh network uses _____ switching.	
A. Packet	B. Circuit
C. PoE	D. Stackable

Answer is : A

ECOMMERCE

The ARPANET researchers created _____.

- | | |
|------------------------------------|-------------------------------|
| A. National Communication Protocol | B. Internet Protocol |
| C. Network Communication protocol | D. Transport Control Protocol |

Answer is : C

TCP/IP is capable of connecting multiple independent networks through _____.

- | | |
|------------|-------------|
| A. routers | B. switches |
| C. hubs | D. cables |

Answer is : A

CSNET included ARPANET and PHONENET

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : TRUE

The NSFNET backbone service was the largest single government investment in the NSF-funded program.

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : TRUE

The internet, cable TV, computer networks are applications of _____.

- | | |
|------------------------------|------------|
| A. Information Super highway | B. ARPANET |
| C. ESNET | D. EBONE |

Answer is : A

ECOMMERCE

Present NSFNET is an example of _____.

A. BITNET	B. National Research & Education Network
C. Early NSFNET	D. Privatization & Commercialization

Answer is : D

ARPA funded the development of _____.

A. LINUX	B. Berkeley UNIX
C. MULTICS	D. UNICS

Answer is : B

National Information Infrastructure is also called as _____.

A. Modern NSFNET	B. Broad band
C. I-way	D. High-performance computer

Answer is : C

EFT stands for

A. Electronic fund transmission	B. Electronic foreign transmission
C. Electronic feature transfer	D. Electronic feature transmit

Answer is : A

Abbreviate EDI

A. Electronic data interface	B. Electronic datatype interface
C. Electronic devic interface	D. Electronic data integer

Answer is : A

ECOMMERCE

SSL stands for

A. Socket secure layer	B. Secondary segment layer
C. Secure sockets layer	D. Secure system layer

Answer is : C

SET is

A. System Electronic Transmit	B. Secure electronic transaction
C. System Elemental transmission	D. Symmetric electronic transfer

Answer is : B

MIME is

A. Multiple intranet mail extension	B. multimedia internet mail execution
C. Multiple interconnect mail extension	D. Multipurpose internet mail extension

Answer is : D

Cable TV set-top boxes, computer-based telephone, hubs, wiring closets and routers & digital switches are called

A. CPE	B. terminal equipment
C. both a or b	D. none of the above

Answer is : C

ECOMMERCE

_____ is a special-purpose computer with powerful graphics and communication features but with limited versatility

- | | |
|-----------------------------|-------------------------------|
| A. Computer-based telephone | B. routers & digital switches |
| C. set-top boxes | D. I-way |

Answer is : C

_____ is available via coaxial or fiber owned by IXC

- | | |
|---------------------------|-----------------------|
| A. Long-distance networks | B. satellite networks |
| C. wi-fi | D. none of the above |

Answer is : A

_____ consists of various government networks, regional networks, campus networks and some international networks.

- | | |
|----------------------|----------------------|
| A. Academic internet | B. Core internet |
| C. Both a or b | D. None of the above |

Answer is : C

_____ is the premier group of research IP networks in United states

- | | |
|-----------|-----------|
| A. NSFNET | B. EBONE |
| C. UUNET | D. PSINet |

Answer is : A

ECOMMERCE

EDI is			
A.	Electronic data interchange	B.	Electronic data interface
C.	Electronic data interrupt	D.	Electronic data intermodule

Answer is : A

EFT is			
A.	Electronic fragmentation time	B.	Electronic funds tester
C.	Electronic funds transfer	D.	None of the above

Answer is : C

CORBA is			
A.	Controlled object response broker architecture	B.	Common Object Request Broker Architecture
C.	Common object response broker architecture	D.	Controlled object Request broker architecture

Answer is : B

The success of web hypertext publishing is aided by which of the following			
A.	More powerful workstations	B.	High-resolution graphic displays
C.	Faster network communication	D.	All the above

Answer is : D

ECOMMERCE

_____ is an approach to information management in which data are stored in a network of documents connected by links.

- | | |
|--------------|----------------|
| A. Hypertext | B. Linked text |
| C. Hyperdata | D. none |

Answer is : A

_____ is a system which is made of nodes and links

- | | |
|-------------------|------------------|
| A. hypermedia | B. webpage |
| C. • web document | D. all the above |

Answer is : D

The node from which a link originates is called as

- | | |
|----------------|-----------|
| A. reference | B. anchor |
| C. both a or b | D. none |

Answer is : C

_____ is a unique call number that provides the exact location of every data in the universal network

- | | |
|--------|---------|
| A. URL | B. http |
| C. www | D. none |

Answer is : A

ECOMMERCE

HTML enables document creation for the web by embedding control codes in _____ text.

- | | |
|-----------|---------|
| A. ASCII | B. ANSI |
| C. ANSI C | D. none |

Answer is : A

Entertainment, financial services, essential services, education and training etc can be termed as

- | | |
|-------------------------------------|---------------------------------|
| A. • consumer-oriented applications | B. • consumer-oriented services |
| C. a only | D. both a and b |

Answer is : D

_____ includes search and discovery for a set of products in the larger information space capable of meeting customer requirements and products

- | | |
|------------------------------------|--------------------------------|
| A. pre-purchase preparation phase | B. purchase consummation phase |
| C. post-purchase interaction phase | D. none |

Answer is : A

ECOMMERCE

_____ includes mercantile protocols that specify the flow of information and documents associated with purchasing.

A. pre-purchase preparation phase	B. purchase consummation phase
C. • post-purchase interaction phase	D. none

Answer is : B

_____ includes customer service and support to address customer complaints, product returns, and product defects.

A. pre-purchase preparation phase	B. • purchase consummation phase
C. • post-purchase interaction phase	D. none

Answer is : C

ECOMMERCE

To facilitate better consumer and organizational search, software intermediaries called

A. information brokers	B. • brokerages
C. • information interfaces	D. interface brokers

Answer is : A

50.The following are the components of _____

1. e-cash
2. e-cheque
3. credit card
4. debit card

A. • electronic payment systems	B. • electronic funds transfer
C. • electronic money system	D. none of the above

Answer is : A

51.The following list can be termed as

1. large-scale or wholesale payments (bank-to-bank transfer

ECOMMERCE

2. small-scale or retail payments 3. home banking	
A. • Banking and financial payments	B. • Retailing payments
C. • On-line electronic commerce payments	D. Credit card-based payments systems

Answer is : A

The following list can be termed as 1. Credit cards 2. Private label credit/debit cards 3. Charge cards	
A. • Banking and financial payments	B. • Retailing payments
C. • On-line electronic commerce payments	D. Credit card-based payments systems

Answer is : B

The following list can be termed as 1. Token-based payment systems 2. Electronic cash 3. Electronic cheque 4. Smart cards or debit cards	
A. • Banking and financial payments	B. • Retailing payments

ECOMMERCE

C. • On-line electronic commerce payments		D. Credit card-based payments systems	

Answer is : C

An example of on-line currency exchange is

A. e-cash	B. debit or prepaid
C. credit or postpaid	D. none

Answer is : A

Users pay in advance for the privilege of getting information or service

A. debit	B. credit
C. • real-time	D. none

Answer is : A

The server authenticates the customers and verifies with the bank that funds are adequate before purchase

A. • debit	B. credit
C. real-time	D. none

ECOMMERCE

Answer is : B

_____ are credit and debit cards and other card products enhanced with microprocessors capable of holding more information than traditional magnetic stripe

A. • smart cards	B. enhanced credit cards
C. optimized debit cards	D. none

Answer is : A

RGTS is

A. Real Time Gross Settlement	B. Revenue Teller Gross Settlement
C. • Real Time Gross Service	D. none

Answer is : A

NEFT is

A. • Node based Electronic Funds Transfer System	B. • Node based Electronic Funds Transfer Service
C. 1. National Electronics Funds Transfer Service	D. National Electronics Funds Transfer System

Answer is : D

ECOMMERCE

IMPS is	
A. • Immediate Payment Service	B. • Intermediate Payment System
C. 1. Immediate Payment System	D. Intermediate Payment Service.

Answer is : A

DES is	
A. Digital Evaluation System	B. Digital Encryption Standard
C. Digital Encryption System	D. Double Encryption Standard

Answer is : B

Which one of the following is not one of the major types of e-commerce?	
A. • C2B	B. B2C
C. B2B	D. C2C

Answer is : A

ECOMMERCE

Which of the following refers to creating products tailored to individual customers?

A. • Customization	B. Aggregation
C. • Direct materials	D. Reverse auction

Answer is : A

What web server functionality allows to verify username and password and process certificates and encryption information

A. • Processing of HTTP request	B. • File transfer protocol
C. 1. Data capture	D. Security services

Answer is : D

The fastest growing form of online advertising is _____

A. • Banner ads	B. • Pop-up ads
C. Rich media/video ads	D. Pop-under ads

Answer is : D

The term EDI stands for -----Data Interchange

A. Electric	B. Electronic
-------------	---------------

ECOMMERCE

C. Elementary	D. Extended
---------------	-------------

Answer is : B

Which of the following is coming under EDI?	
A. Business	B. Data Processing
C. Data communication	D. All the above

Answer is : D

SMTP stands for	
A. Small	B. Simple
C. Simulated	D. Symmetric

Answer is : B

EDI requires a business process as it deals with business forms exchange.	
A. True	B. False

Answer is : TRUE

VAN stands for ----- Added Networks	
A. Vast	B. Variable
C. Value	D. Vulnerability

Answer is : C

ECOMMERCE

EDI concept makes use of direct human intervention

A. True

B. False

DI

A. True

B. False

Answer is : FALSE

EDI is -----

A. Fast

B. Inexpensive

C. Safe

D. All the above

Answer is : D

Electronic commerce is a subset of Electronic Data Interchange.

A. True

B. False

Answer is : FALSE

Electronic Data interchange is a subset of electronic commerce

A. True

B. False

Answer is : TRUE

Fax is primarily -----

A. Paper Based

B. Requires Human interface

C. A and B

D. A or B

ECOMMERCE

Answer is : C

Fax machines accept non standard data types	
A. True	B. False

Answer is : TRUE

EDI requires stanadrad message formats between trading partners.	
A. True	B. False

Answer is : TRUE

EFT stands for Electronic Funds -----	
A. Trading	B. Transmission
C. Transport	D. Transfe

Answer is : A

EFTS is ----- tansfer between banks.	
A. Debit	B. Credit
C. A and B	D. None

Answer is : B

ECOMMERCE

Fed wire is a funds Transfer service in-----

- | | |
|----------|------------------|
| A. India | B. United States |
| C. Dubai | D. Australia |

Answer is : B

ACH transfers are used to process ----- payments for settlement in one or two business days

- | | |
|----------------|-----------------|
| A. high volume | B. small dollar |
| C. A and B | D. A or B |

Answer is : C

Communication lines are not necessary for Electronic fund Transfer

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : FALSE

In EDI, Quick response means -----

- | | |
|-------------------|-----------------------------------|
| A. better service | B. availability of wider products |
| C. Both A and B | D. None |

Answer is : C

The clock pulses regulate the rate and timing of the data flow.

- | | |
|---------|----------|
| A. True | B. False |
|---------|----------|

Answer is : TRUE

ECOMMERCE

X.435 is not a protocol.	
A. True	B. False

Answer is : FALSE

MTA stands for -----Transfer Agent	
A. Modem	B. Message
C. Modern	D. More

Answer is : B

Confidentiality is concerned with the unauthorized viewing of confidential or proprietary data	
A. True	B. False

Answer is : TRUE

Encryption prevents ----- from viewing data that is transmitted over telecommunications channels	
A. snoopers	B. other prying seyes
C. hackers	D. All the above

Answer is : D

There are ----- basic encryption schemes.	
A. four	B. five
C. two	D. three

ECOMMERCE

Answer is : C

Private-key encryption requires that both sending and receiving parties do not have the same private-encryption keys

A. True	B. False
---------	----------

Answer is : FALSE

With public-key encryption, a message recipient generates a matched set of keys, one public key and one private key

A. True	B. False
---------	----------

Answer is : TRUE

Data ----- is a guarantee that what was sent by the sender is actually what is received by the receiver

A. Integrity	B. Reliability
C. Consistency	D. Clarity

Answer is : A

VAN increases the need for paper transfers.

A. True	B. False
---------	----------

Answer is : FALSE

SCM stands for ----- Chain Management

A. Supplier	B. Supply
C. Surplus	D. Score

Answer is : B

ECOMMERCE

Which of the following is a graphic display on a web page used for advertising?

A. portal	B. shopping cart
C. icon	D. banner ad

Answer is : D

The best products to sell in B2C e-commerce are

A. Small products	B. Specialty products
C. Digital products	D. Fresh products

Answer is : C

VAN stands for

A. Value added network	B. Value aero network
C. Value access network	D. Value addressed network

Answer is : A

TCL is

A. Tool calling language	B. Tool comment language
C. Tool comments language	D. Tool casting language

Answer is : B

Which of these functions is called to display the output of an applet

A. display()	B. PrintApplet()
C. paint()	D. displayApplet()

Answer is : C

ECOMMERCE

100. Which of these methods can be used to output a string in an applet

A. dispaly()

B. Print()

C. drawString()

D. transient()

Answer is : C

Which of these method is a part of Abstract Window Toolkit(AWT)?

A. display()

B. paint()

C. drawString()

D. transient()

Answer is : B

Which of these modifiers can be used for a variable so that it can be accessed from any thread or part of a program ?

A. Transient

B. volatile

C. global

D. No motifier is need

Answer is : B

Which of these operators can be used to get run time information about an object ?

A. getinfo

B. info

C. instanceof

D. getinfoof

Answer is : C

Which of the following is/are required to allow computer to communicate over a network ?

A. communications programs

B. Network communicators

C. Communications services

D. Network Services

ECOMMERCE

Answer is : D

Presentations can be made live over the internet to group of people using which of the following ?

A. E-mail	B. Collaborative conferencing
C. Videoconferencing	D. Webcasting

Answer is : D

Electronic data interchange ,EDI , uses which of the following to allow the computer of two different companies to 'talk' to one another ?

A. Application software	B. Interaction software
C. Translation software	D. None of the above

Answer is : C

The _____ typology is a circular network with a computer in the centre

A. Star	B. Ring
C. Line	D. Bus

Answer is : A

Which of the following companies is common carrier ?

A. IBM	B. AOL
C. Microsoft	D. AT&T

Answer is : D

A network connection that is described as broadband is:

ECOMMERCE

A. Slower than modem connection	B. Achieved over satellite connections
C. Fast enough for multimedia transmissions	D. None of the above

Answer is : C

LANs can operate over:	
A. Fiber lines.	B. microwaves
C. T1 lines	D. Co-axial cables

Answer is : D

Which of the following is a physical channel ?	
A. Satellite	B. Twisted pair
C. Microwave	D. All of the above

Answer is : B

A network that is used by the general public but runs over common carrier lines is called a:	
A. Circuit switched network	B. packet switched network
C. Private network	D. Public-access network

Answer is : B

Which of the following lines can be used to create a private connection over the internet using lines owned by a common carrier ?	
A. Reserved line	B. Private line
C. Dedicated line	D. None of the above

Answer is : C

ECOMMERCE

A company that provides private computer network support services to other companies is called:

A. Backbone network	B. Private network
C. public network	D. Value-added network

Answer is : D

Which of the following device that forwards information packets to their destination

A. Bridge	B. Transmitter
C. Modem	D. Router

Answer is : D

_____ is a telecommunication standard that is used in the united states and uses circuit switching to transmit message.

A. CDMA	B. TDMA
C. GPRS	D. 3G services

Answer is : A

Which of the following are characteristics of a multi-user computer system?

A. Shared printers.	B. Shared software
C. Shared information	D. All of the above

Answer is : D

ECOMMERCE

Which of the following is need for a computer network?

A. Application software	B. Network operating system
C. operating system	D. System software

Answer is : B

World wide web (WWW) was introduced in the year _____

A. 1994	B. 1996
C. 1992	D. 1990

Answer is : A

_____ is an early from of E-commerce

A. SCM	B. EDI
C. Both of these	D. None of these

Answer is : B

_____ is concerned with the buying and selling information products and services over computer communication network

A. Commerce	B. E-commerce
C. E-business	D. None of the above

Answer is : B

_____ is concerned with the buying and selling information products and services over computer communication network

ECOMMERCE

A. Commerce			B. E-commerce
C. E-business			D. None of the above

Answer is : B

_____ is a set of standard developed in the 1960s to exchange business information and to do electronic transactions

A. EDI			B. Protocol
C. TCP/IP			D. None of these

Answer is : A

Which among the following product is suitable for E-commerce?

A. Book			B. Vegetables
C. All of these			D. None of these

Answer is : A

_____ allows a business application on the computer of one organization to communicate directly with business application on the computer of another company.

A. EDI			B. Protocols
C. Standards			D. Business applications

Answer is : A

Electronic exchange of business document in a standard format is known as _____

A. E-commerce			B. E-business
C. EDI			D. None of the above

ECOMMERCE

Answer is : C

_____ is essentially a business process that connects manufactures,retailers,customer and supply in the form a chain to develop and deliver products.			
A.	E-commerce	B.	EDI
C.	Networking	D.	SCM

Answer is : D

Which of the following is not a party of SCM?			
A.	Suppliers	B.	Manufacturers
C.	Distributers	D.	Customers

Answer is : C

_____ is a commercial process that include production, distribution,sales or delivery of good and services though electronic means			
A.	E-commerce	B.	SCM
C.	EDI	D.	None of these

Answer is : A

Among the alternate models of B2B e-commerce _____ is the best means to obtain a competitive advantage in the market place.			
A.	Process based	B.	strategic relationship based
C.	Transaction based	D.	Any of these

Answer is : B

ECOMMERCE

_____ focus on producing a highly intergraded value proposition through a managed process .

- | | |
|------------|------------------|
| A. Hubs | B. Community |
| C. content | D. None of these |

Answer is : A

_____ is basically a concept of online marketing and distribution of product and services over the internet.

- | | |
|--------|--------|
| A. B2G | B. B2E |
| C. B2C | D. B2B |

Answer is : C

_____ E-commerce consists of the sale of product or services from a business to the general public.

- | | |
|--------|--------|
| A. B2G | B. B2E |
| C. B2B | D. B2C |

Answer is : D

Which of the following is not suitable for a B2C transaction ?

- | | |
|------------------------|------------|
| A. Clothes | B. Flowers |
| C. Airline reservation | D. None |

Answer is : D

_____ e-commerce transaction has the advantage of eliminating middlemen.

- | | |
|--------|--------|
| A. B2G | B. B2C |
| C. B2B | D. B2E |

ECOMMERCE

Answer is : B

_____ e-commerce involves customers gathering information purchasing and receiving products over an electronic network

A. B2G	B. B2E
C. B2B	D. B2C

Answer is : D

Which of the following is not an user of B2C e-commerce

A. Manufacture	B. Distributers
C. Publishers	D. None

Answer is : D

_____ e-commerce involves the electronic facilitation of transaction between customers through some third party

A. C2C	B. B2E
C. B2B	D. B2G

Answer is : A

Which among the following is an example of C2C ?

A. e-Bay	B. Amazon.com
C. Rentalic.com	D. All of these

Answer is : D

Firefox is a

A. Web browser	B. Web development
C. Web liker	D. Web analytics

ECOMMERCE

Answer is : A

Set of instructions which called a			
A.	program	B.	Prompt
C.	Control	D.	Group instruction

Answer is : A

E-commerce is			
A.	Electronic commerce	B.	Electric commerce
C.	Electro commerce	D.	None of these

Answer is : A
